Core Expertise

I. Data Engineering, Analytics & Reporting

- Data Pipelines & ETL Processes
- Data Cleaning & Transformation
- SQL & Database Querying
- Data Validation & Governance
- Exploratory Data Analysis (EDA)
- Data Visualization & Reporting
- API & Data Stream Integration
- Business & Systems Analysis
- Dashboard Development
- Performance Metrics & Reporting

Data Analysis and Reporting Tech Stack: Python (NumPy, Pandas, Sci-kit, Matplotlib), MS Excel (Pivot, Excel VBA), Tableau, PowerBI, SQL, Oracle SQL Developer, Microsoft SQL Server (SSMS), SQL Server Integration Services (SSIS), Draw.io (Database Design), Domo, Google Sheets, Github

AI-Assisted Reporting & Productivity:

- Utilized ChatGPT and Claude to support report drafting, content organization, quality review, documentation development, and workflow efficiency.
- Applied structured prompting techniques to improve consistency and accuracy of reporting outputs.
- Leveraged AI-assisted tools for summarization, formatting validation, and knowledge management activities.

II. Full Stack Development & Technical Systems

Operating Systems: Windows, macOS, Linux, iOS, Android

Front-End Development: Figma (UI Wireframes, Mockups & Prototyping), HTML 5, CSS 3, Bootstrap, Tailwind, JavaScript, React, VueJS (Composition API, Options API, Vue Router, Pinia, Axios)

Back-End Development: Python (Django), Node.js, Express, REST/API Integration, Java

Database & Data Management: Draw.io (ERD Design), SQL, Oracle SQL Developer, Microsoft SQL Server (SSMS), SQL Server Integration Services (SSIS), MongoDB

Frameworks & Libraries: Python frameworks (Django, Pandas, NumPy, Matplotlib)

Development Tools & Platforms: JupyterLab, Anaconda, Visual Studio, Visual Studio Code, IntelliJ IDEA, Git, Github, Vite, Vercel

Systems, Virtualization & Infrastructure: Linux Administration (Kali, Ubuntu, Mint), Proxmox, LXC Containers, Virtual Machines, Homelab Management, Network File Sharing, Cross-Platform Troubleshooting

AI Tools & Productivity: AI-Assisted Troubleshooting & Programming (ChatGPT, Claude, Stitch), Canva

III. Training, Coaching & Communication

- Training Delivery & Facilitation
- Technical/Product Training
- Coaching & Performance Improvement
- User Support & Guidance
- Stakeholder Communication
- Customer Experience Training (CET)
- Documentation & Knowledge Sharing
- English Instruction & Curriculum Support

Training Tech Stack: Microsoft Word, Microsoft PowerPoint, Microsoft Excel, MS Teams, DaVinci Resolve, Canva, Audacity, ChatGPT/Claude (thought organization, grammar check, documentation), Autodesk Maya 2025

Career History

Data Engineer

Concentrix (Remote)

Nov 2022 – March 2026 (3 years 4 months)

- Supported production and maintenance of global business intelligence and operational reporting solutions by integrating data from databases, APIs, and enterprise reporting platforms
- Performed data validation, cleansing, and reconciliation to ensure accuracy, consistency, and reliability of reporting outputs across multiple business functions and regions
- Collaborated with global business stakeholders, including Business Analysts and reporting teams across multiple regions, to gather requirements and deliver actionable business intelligence insights
- Resolved reporting issues, investigated data discrepancies, and addressed system gaps impacting report accuracy and delivery timelines in a global, cross-functional environment
- Supported migration from legacy Microsoft reporting systems to the Domo analytics platform, contributing to enterprise-wide reporting modernization and standardization initiatives
- Developed documentation, reporting guides, and training materials to support adoption of BI tools and standardized reporting practices across global teams
- Delivered enablement and training support for Business Analysts worldwide on Domo report development, workflows, and self-service analytics capabilities, accelerating global adoption of the platform
- Selected by BI leadership to support Domo rollout initiatives and drive cross-regional knowledge transfer, improving reporting consistency and adoption across global teams
- Worked within a distributed team of international data and BI professionals supporting stakeholders across multiple regions and time zones

Sr Trainer I (Capital One-North American Region)

Concentrix (Onsite)

Feb 2019 - Nov 2022 (3 years 9 months)

- Delivered customer experience training, onboarding programs, and product readiness sessions for new hires entering production environments
- Provided real-time coaching and performance feedback during nesting to improve operational readiness and service quality
- Facilitated calibration sessions and performance discussions with operations and QA teams to address quality gaps
- Participated in hiring, onboarding, and enablement of new trainers, including knowledge transfer and coaching support
- Developed Excel-based tracking systems to monitor training deliverables, compliance requirements, and completion status
- Owned compliance reporting and monitoring of mandatory training courses for production agents and management during non-training periods
- Consolidated compliance data, tracked completion status, and coordinated with operations leaders to ensure timely completion of regulatory, data privacy, and financial requirements
- Implemented structured tracking and escalation processes that improved visibility of compliance risks and completion gaps
- Collaborated with operations, WFM, and leadership teams to improve compliance completion rates and reduce escalation risks
- Maintained training documentation, reporting records, and performance trackers for audit readiness and operational governance

Education

Tech Career Program (Full Stack Development)

Zuitt Co.

Apr 2026 – Aug 2026

Capstone 1 – Frontend | Portfolio Web Application

GitHub Page: <https://forensickchemist.github.io/frontend-capstone-portfolio/>

GitHub Repo: <https://github.com/forensickchemist/frontend-capstone-portfolio>

- Designed and developed a responsive front-end web application using HTML5, CSS3, and Bootstrap, following modern UI/UX principles
- Created wireframes and high-fidelity mockups using Stitch and Figma to plan layout structure, user flow, and visual hierarchy
- Implemented a fully responsive, mobile-first interface with reusable components and structured design tokens for typography and color systems
- Translated UI designs into production-ready static web pages with accessibility considerations (skip links, focus states, semantic structure)
- Ensured cross-device compatibility and consistent layout behavior across modern browsers

Capstone 2 – Backend | Ecommerce REST API

GitHub Repo: <https://github.com/forensickchemist/e-commerce-rest-api>

Postman Documentation: <https://documenter.getpostman.com/view/54166037/2sBY4MtgJ5>

Live API: <https://x0ppt9whz5.execute-api.us-east-2.amazonaws.com/production>

- Built and deployed a RESTful e-commerce API using **Node.js, Express.js, MongoDB, and Mongoose**.
- Implemented **JWT-based authentication and role-based authorization** for customer and administrator access.
- Developed API functionality for **user management, product catalog, shopping cart operations, checkout, and order management**.
- Secured user passwords using **bcryptjs** and implemented centralized error handling and input validation.
- Deployed the backend using **AWS Lambda** and connected it to **MongoDB Atlas**.
- Tested and documented API endpoints using **Postman**.

BS IT Data Analytics

Mapua Malayan Digital College

Ongoing

Academic Projects

- **Exploratory Data Analysis & Machine Learning**
Performed exploratory data analysis and basic machine learning workflows using Python (Pandas, NumPy, Scikit-learn, Matplotlib) to identify patterns, trends, and insights from structured datasets.
- **Data Mining & Pattern Analysis**
Applied data mining techniques using Python libraries (Pandas, NumPy, Scikit-learn) to extract meaningful patterns and support data-driven interpretation of datasets.
- **Inventory Management System (Java)**
Developed a console-based inventory management system in Java, implementing core CRUD operations and basic data handling logic for product tracking and management.
- **Database Design & Data Modeling**
Designed relational database structures using Entity-Relationship Diagrams (ERD), normalization/denormalization principles, and schema planning using Draw.io.
- **Data Visualization & Reporting**
Created dashboards and visual reports using Excel, Python, Tableau, and Power BI to present insights and support data-driven decision-making.

Bachelor of Secondary Education (Major in Chemistry)
Philippine Normal University - Manila
Graduated

Licenses and Certifications

- Autodesk Maya 2025
- Professional License for Teachers - Issued by Professional Regulation Commission

Workshops / Seminars / Webinars Attended

- Full Stack Web Development by RivanCyber Training Institute Inc (Jan 24-Feb 14, 2026)
- Autodesk Maya 2025 by MST CONNECT PH (Aug 18–22, 2025)
- Data Dialogues: Make it Make Sense by UP Data Science Society & Globe (May 30, 2025)
- Free Coding Bootcamp: Data Visualization Workshop by JPCS & Zuit (May 9, 2025)
- Introduction to Wolfram: AI Tools for Data Science by UP Data Science Society (Apr 30, 2025)
- Introduction to Python Programming with Django by UPSITF (Feb–Aug 2022)
- Java Programming and Java Web with J2EE by Mapua Institute of Technology - Makati (Feb–Apr 2013)
